## Hasil

Kode HTML dan CSS di atas membentuk halaman formulir pemesanan yang user-friendly dan berpenampilan profesional. Formulir ini digunakan untuk mengumpulkan informasi pemesanan kamar seperti ID pemesan, nama pemesan, nomor identitas, tipe kamar, tanggal pemesanan, durasi menginap, opsi sarapan, dan total biaya. Tata letaknya rapi dan terpusat, dengan batas maksimal lebar 500px untuk menjaga form tetap kompak dan nyaman dilihat di layar berbagai ukuran. CSS mengatur setiap elemen dengan detail, seperti padding dan margin yang cukup untuk memisahkan elemen form, memberikan border-radius pada kontainer utama agar tampil modern, serta bayangan lembut di sekitar form untuk memberi efek kedalaman, contohnya seperti gambar dibawah.

The screenshot shows a web browser window with the address bar displaying 'http://127.0.0.1:3000/Modul 3/Tugas1-M3.html'. The main content is a 'Form Pemesanan' (Booking Form) centered on a light gray background. The form is a white card with rounded corners and a subtle shadow. It contains the following fields and controls:

- ID Pemesan :** Text input with value '12345'.
- Nama Pemesan :** Text input with value 'Anjar Tejakusumah'.
- Nomor Identitas :** Text input with value '5'.
- Tipe Kamar :** Dropdown menu with value '-- Pilih --'.
- Tanggal Pesan :** Date input with value '11/11/2024' and a calendar icon.
- Durasi Menginap :** Text input with value '2' followed by the label 'Hari'.
- Termasuk Breakfast?** Checkbox with value 'Ya' (checked).
- Total Bayar :** Text input with value 'Rp.500.000'.
- Buttons:** Two buttons at the bottom: 'Simpan' (Save) in blue and 'Batal' (Cancel) in red.

Hasil

Kode HTML dan CSS di atas menghasilkan tampilan form yang rapi dan responsif untuk menambah data kamar dan fasilitas. Masing-masing form ditempatkan di dalam kontainer dengan batas lebar maksimum 600px, berisi tabel untuk merapikan label dan input secara sejajar. Penggunaan padding, box-shadow, dan warna latar putih pada kontainer memberi kesan bersih dan profesional. Setiap input memiliki lebar penuh agar rapi, dan tombol submit serta reset diberi warna berbeda untuk membedakan fungsi, hasil seperti gambar dibawah.

### Hasil

Kode HTML berikut membuat struktur dasar sebuah halaman web untuk "Grand Hotel" dengan berbagai elemen antarmuka pengguna. Header menampilkan logo dan nama hotel, serta menu navigasi dengan beberapa opsi, termasuk submenu berlapis untuk fasilitas yang muncul ketika menu diklik. Konten utama terbagi menjadi dua bagian: sidebar kiri yang berisi tiga video YouTube tertanam dan bagian utama di sebelah kanan dengan galeri gambar yang menampilkan berbagai foto kamar hotel. Setiap gambar ditampilkan dalam tata letak grid dengan tiga kolom, hasilnya seperti gambar dibawah.
